16. ABSTRACT

This publication includes a listing of all monitoring sites active in 1977 which have submitted SAROAD Site Identification Form (Figures 1 and 2). Each Site to be classified as operational and listed in this directory must have sampled at least one pollutant in 1977. In addition to the site listing, this document reflects useful information on the pollutant sampled.

OF
AIR QUALITY MONITORING SITES
ACTIVE IN 1977

INTRODUCTION

The Environmental Protection Agency (EPA) operates the Aerometric and Emissions Reporting System (AEROS) for the storage, summary, and retrieval of aerometric and emissions data. The Storage and Retrieval of Aerometric Data (SAROAD) system, one of the major component data systems in AEROS, is comprised of air quality and site information data from the various contributing networks. Data are submitted to EPA from local, state, and Federal air pollution control agencies as well as a limited number of private institutions. Prior to the submission of any ambient air data, the participating agency must supply EPA with specific information related to the sampling site and its environment. It is imperative that this site information be complete and accurate for the proper interpretation and analysis of the aerometric data contained in the data bank.

A prior publication, the *Directory of Air Quality Monitoring Sites, 1972*, EPA-450/2-73-006, contained information on all monitoring sites that submitted a SAROAD (Storage and Retrieval of Aerometric Data) Site Identification Form (Figures 1 and 2) through 1972, whether the site was then active or inactive. Also, the publication, *Directory of Air Monitoring Sites Active in 1973*, EPA-450/2-75-006, *Directory of Air Quality Monitoring Sites Active in 1974*, EPA-450/2-76-008, *Directory of Air Quality Monitoring Sites Active in 1975*, EPA-450/2-77-009, and *Directory of Air Quality Monitoring Sites Active in 1976*, EPA-450/2-78-002, contained information on all monitoring sites that reported SAROAD data for 1973, 1974, 1975, and 1976. For historical information relating to sites active before 1977, but not during 1977, please consult the above publications.

This present publication includes a listing of all monitoring sites active in 1977 that have submitted a SAROAD (Storage and Retrieval of Aerometric Data) Site Identification Form (Figures 1 and 2). To be classified as operational and listed in this directory, each site must have sampled at least one pollutant in 1977. In addition to the site listings, this document reflects useful information on the pollutant(s) sampled. No pollutant information is given for sampling intervals greater than 24 hours; therefore, if a site only reported data for these sampling intervals, no information would be included for the site.

The organization of this directory is based on the SAROAD site code; therefore, to find a specific sampling location, it is necessary to thoroughly understand the site code. The following paragraphs and tables describe the various identifying codes used to characterize the site information.

Figure 1.

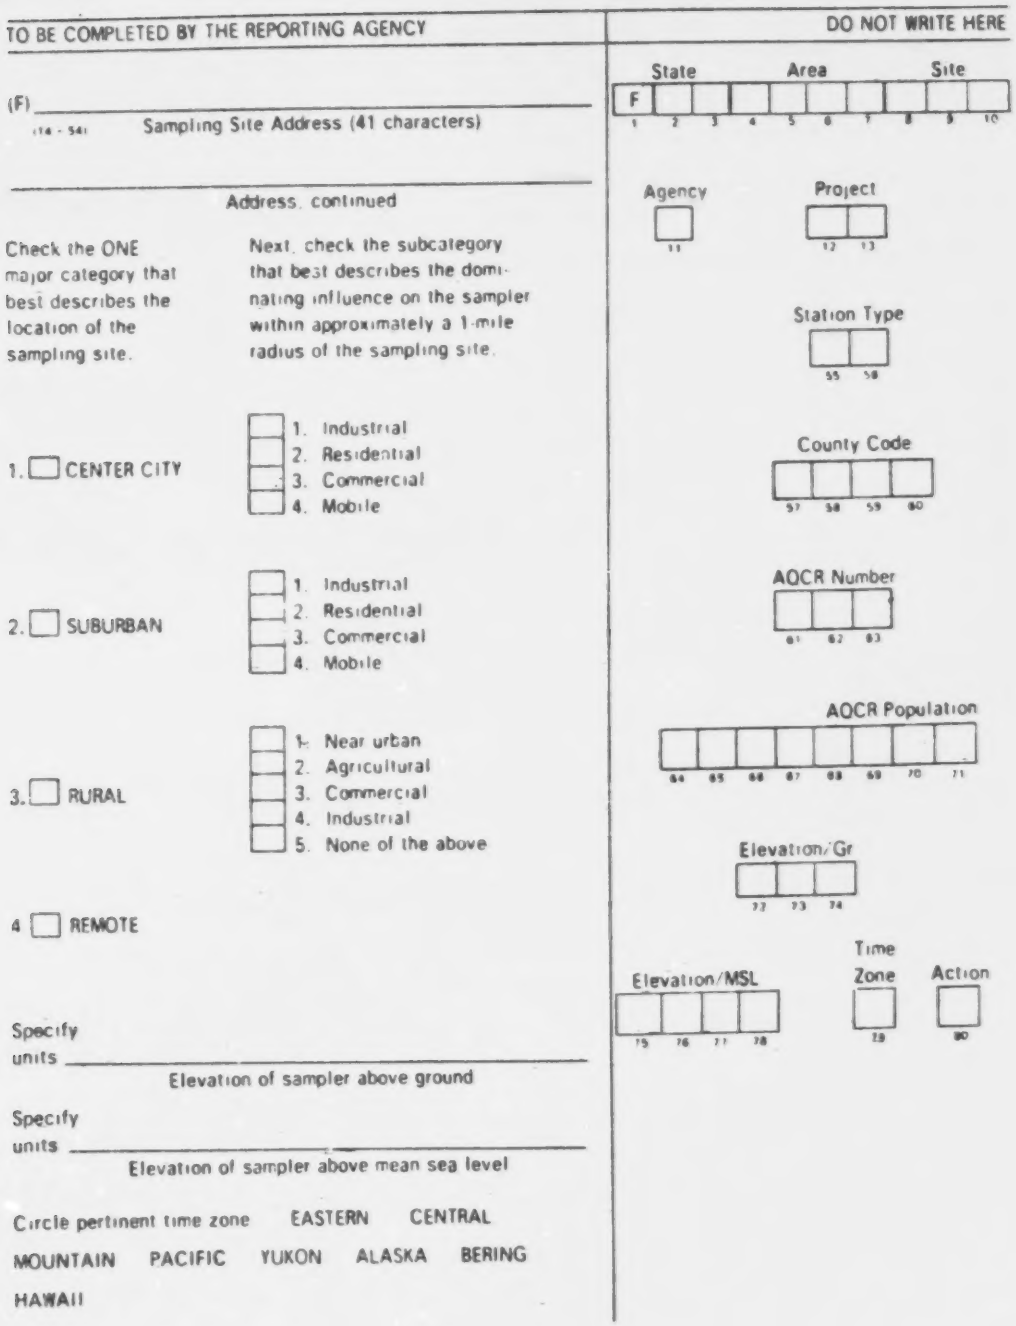
Approval expires 6/30/76

Figure 2.

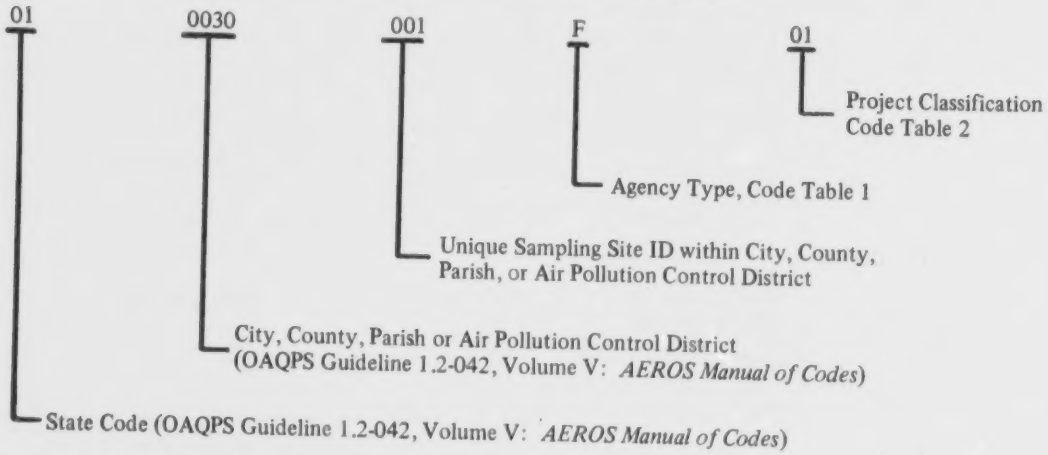
SAROAD Site Identification Form (continued)



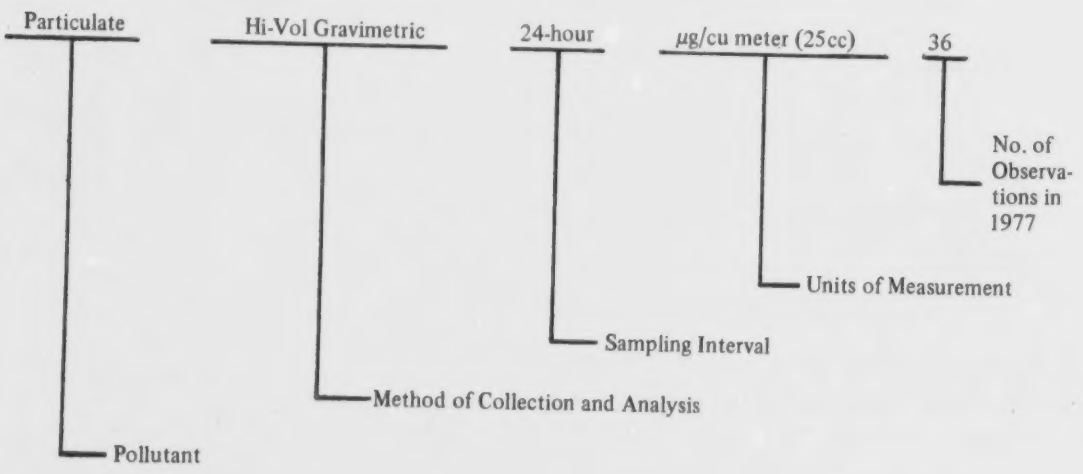
The most important code used in the data bank is the unique 12-digit SAROAD site code. This code, based on the sampling site location, is assigned by EPA. The first two digits of the site code identify the state code, which has been assigned sequentially to an alphabetical listing of state names. For completeness, the District of Columbia, Puerto Rico, Guam, Virgin Islands, and American Samoa have also been assigned codes. The next four digits of the site code identify the city, county, parish, or air pollution control district within the state. This code is obtained from a publication listing the codes within each state alphabetically for all cities with a population of 2,500 or more, and all counties, parishes, and control districts, regardless of population (OAQPS Guideline 1.2-042, Volume V: *AEROS Manual of Codes*). The following three digits identify the particular sampling site within the city or county, and the next letter and two digits identify the type of agency responsible for the sample analysis (Table 1) and the type of project being conducted at the site (Table 2).

It is important to note that this 12-digit site code assigned by EPA is used to identify data being submitted from the sampling site, and cannot be changed in any manner without prior notification by EPA.

The following example illustrates the format of a site identification code.



Immediately after an individual site description, the pollutant sampling information begins. For ease of reading and conservation of space, some headings have not been repeated. To serve as a guide, the following example shows the items contained in each column.



CODE TABLE 1 - AGENCY TYPE

A	EPA Headquarters group responsible for atmospheric surveillance
B	EPA Headquarters group responsible for meteorological activity
C	EPA Headquarters group responsible for effects research
D	EPA Headquarters group responsible for atmospheric research
E	EPA Headquarters group responsible for abatement activity
F	State agency
G	County agency
H	City agency
I	District agency
J	Private
K	Institution (university, college, etc.)
L	Military
M	International agency
N	Other Federal nonmilitary agency
P	EPA Regional Office group responsible for atmospheric surveillance
Q	World Meteorological Organization
R	World Health Organization
S-Y	Open for future expansion
Z	Other

Following this introduction is a computer listing of all the information currently stored in the Aerometric and Emissions Reporting System for sites active during 1977. The site information is sorted sequentially by the 12-digit SAROAD site code; data for each state begin on a new page. A directory of this nature requires constant revision. To ensure currency, corrections and additions will be incorporated in editions published annually. Anyone detecting errors in this publication should notify Chief, Requests and Information Section (MD-14), National Air Data Branch, Office of Air Quality Planning and Standards, Research Triangle Park, North Carolina 27711, via the appropriate EPA Regional Office.
